

Contents

1 Modeling and the UML	1
1.1 First-Person Shooter.....	1
1.1.1 Classifiers.....	2
1.1.2 Generalization.....	3
1.1.3 Association.....	4
1.1.4 Dependency	6
1.1.5 Realization	7
1.2 From UML to Code.....	8
Exercises	9
2 Data Structures Defined	11
2.1 Abstract Data Types and Data Structures	11
2.2 Collections and Containers	12
2.3 Our Destination: The Final Software Model.....	13
Exercises	15
3 The Vector	17
3.1 Our Current Model.....	17
3.2 The Vector ADT	18
3.3 A Vector Data Structure.....	19
3.4 Class Object and Type Independence	23
Exercises	24
4 A Dynamic Vector Data Structure and Class Inheritance	25
4.1 Our Current Model.....	25
4.2 Class DynamicVector.....	26
4.3 Class Inheritance	28
4.3.1 Using Inheritance: Best Practices	28
4.3.2 Inheritance Applied to Our Vector Containers	31
Exercises	36

5 An Introduction to Vector Searching and Sorting	37
5.1 Our Current Model.....	37
5.2 Asymptotic Algorithm Analysis	38
5.2.1 Growth Rates	38
5.2.2 Putting Growth Rates to Work: The Bubble Sort Algorithm and Its Time Analysis	39
5.2.3 Another Example: The Selection Sort Algorithm and Its Time Analysis	42
5.3 Vector Searching: The Linear and Binary Search Algorithms	44
5.3.1 The Linear Search Algorithm	44
5.3.2 The Binary Search Algorithm	45
5.4 Implementing the Aforementioned Algorithms: Classes Search and Sort	46
5.4.1 Java Interfaces and Interface Comparable.....	46
5.4.2 Classes Search and Sort.....	47
Exercises	49
6 The Heap	51
6.1 Our Current Model.....	51
6.2 Heap Preliminaries.....	52
6.3 The Heap ADT.....	53
6.4 Heap Implementation.....	53
6.4.1 Abstract Class Heap.....	54
6.4.2 Class MinHeap	57
6.5 Heap Applications.....	62
6.5.1 Priority Queuing	63
6.5.2 The Heap Sort Algorithm and Its Time Analysis	63
Exercises	65

7 The Stack	67
7.1 Our Current Model.....	68
7.2 The Stack ADT	69
7.3 Stack Implementation	69
7.3.1 Linked Lists	70
7.3.2 Class <code>LinearNode</code> and Some Elementary Linked-List Operations.....	70
7.3.3 A Linked-List Stack Implementation.....	74
7.4 Stack Applications	75
7.4.1 Constant Folding.....	75
7.4.2 Using a Stack to Evaluate an Arithmetic Expression	76
Exercises	86
8 Recursion	87
8.1 Recursive Definitions.....	87
8.2 Method Arguments and the Run-Time Stack.....	88
8.3 More Examples	94
8.3.1 The Factorial Function.....	94
8.3.2 The Fibonacci Sequence	94
8.4 The Pros and Cons of Using Recursion	95
Exercises	97
9 Vector Sorting Revisited.....	99
9.1 The Merge Sort Algorithm and Its Time Analysis.....	99
9.1.1 Merge Sort Implementation	102
9.1.2 Analysis of the Merge Sort	102
9.2 The Quick Sort Algorithm and Its Time Analysis	103
9.2.1 Quick Sort Implementation.....	106
9.2.2 Analysis of the Quick Sort	107
9.3 The Insertion Sort Algorithm and Its Time Analysis.....	107
9.3.1 Insertion Sort Implementation	109
9.3.2 Analysis of the Insertion Sort	110
9.4 Shell's Sort	110
Exercises	111

10 The Queue	113
10.1 Our Current Model.....	113
10.2 The Queue ADT.....	115
10.3 Queue Implementation.....	115
10.3.1 Class DLNode	116
10.3.2 Class Queue.....	116
10.4 Queue Applications.....	117
Exercises	118
11 Generalizing Our Array and Linked-List Containers	119
11.1 Our Current Model.....	119
11.2 Generalizing Our Array Containers	121
11.2.1 Class ArrayContainer	121
11.2.2 Updating Classes Vector and Heap	121
11.3 Generalizing Linked Containers and Linear Linked Containers.....	124
11.3.1 Nested Types.....	124
11.3.2 Generalizing Our Linear Linked Containers by Specializing Class LinkedListContainer	125
Exercises	126
12 The Deque	127
12.1 Our Current Model.....	127
12.2 The Deque ADT.....	129
12.3 Deque Implementation.....	129
12.4 Deque Applications.....	130
Exercises	130
13 The General Binary Tree	131
13.1 Our Current Model.....	131
13.2 The Binary Tree ADT	133
13.3 Binary Tree Implementation	134
13.4 Binary Tree Applications.....	137
13.4.1 Huffman Coding	137
13.4.2 Expression Trees.....	141
Exercises	142

14 The Binary Search Tree.....	143
14.1 Our Current Model.....	143
14.2 The Binary Search Tree ADT	145
14.3 BST Operations.....	145
14.3.1 Inserting into a BST	146
14.3.2 Finding an Element of a BST.....	148
14.3.3 Removing from a BST	148
14.4 BST Implementation	149
14.5 Time Analysis of the Fundamental BST Operations	154
14.6 BST Applications.....	155
Exercises	156
